NICE TO MEET YOU

Hi!

We are Alessandra and Simone, a couple of young videographers who lives in Italy.

We share our love and passion for creating destination wedding films and elopement video.

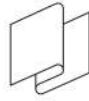

We travel all over the world to tell ***authentic and original tales***, stories that enhance the unique aspects of a couple and their affinity through spontaneous, ***intense and evocative narration***.

OUR STYLE

The story of your wedding is made by using a ***cinematographic artistic style***.

Behind every film there is a masterful editing process during which nothing is left to chance.

Smiles, intense looks and meaningful gestures are captured by our camera to create a fascinating and emotional story.

OUR SERVICE

Two filmmakers will always be there to ensure you the highest quality of the images.

The video will be realized during the whole **ceremony** and will also include some moments filmed **before or/and after the wedding day**, choosing the locations that have a special meaning to you. The video will be made more personal taking inspiration from your passions (cinema, music, art, literature, theatre, etc.).

Together we will be able to create not just a wedding film, but an immersive experience, a journey during which we will develop a **special and unique representation of you and your love story**.

ADDITIONAL INFO

The basic hourly wedding day coverage included in the service is **10 hours**, but you can choose hourly coverage up to **12 hours**.

On the shooting day, however, the coverage will range from **2 to 4 hours** depending on the scenes we want to shoot together.

We'll give you two edited video:

- **Trailer**

The Trailer briefly shows all the emotions of your wedding day and of the shooting in an artistic video, without losing any feeling.

- **Experience Film (starting from 7 minutes)**

Your wedding film narrates one of the most special moment of your lives from an original point of view, combining images and sound fragments in an intimate and suggestive story.

You can also choose to have environmental **aerial shots** that we will record with the drone, to give the video an even more cinematic look.

If you like, you can choose to have **all the footage** we will shoot together, which we will deliver to you cataloged in an external hard drive.

For any information or request don't hesitate to contact us.
It will be a pleasure to meet you.
